CONTENTS

Editors' Foreword ix

Chairman's Preface xi

1. $q\bar{q}$ spectroscopy and search for exotics

New states as observed by the Crystal Barrel experiment
I. Augustin et al. 3c

New results on meson spectroscopy from Obelix
A. Lanaro et al. 13c

Proton–antiproton annihilations to $\phi\phi$ mesons: results from JETSET at LEAR
M. Macrì et al. 27c

Two pion Bose–Einstein correlations in $\bar{p}p$ annihilations at rest
K. Sarigiannis et al. 43c

Light quark spectroscopy at the Fermilab Antiproton Accumulator
M.A. Hasan et al. 53c

Production of $Q\bar{Q}g$ hybrid mesons in $N\bar{N}$ annihilation
T. Gutsche, C.B. Dover and A. Faessler 63c

Physics at SuperLEAR with an external target
W. Oelert 73c

Hadro-production of exotic mesons
K. Peters 93c

Exotica: survey of exotic mesons
G. Karl 113c

2. $\bar{N}N$ interaction (annihilation and scattering)

Antiproton–proton annihilation at rest into two mesons
A.J. Noble et al. 127c

Antinucleon–nucleon annihilation cross section measurements at low energies
F. Iazzi et al. 137c

Results from experiment PS199
A. Martin et al. 147c

Constraints on the spin and isospin dependence of the $N\bar{N}$ potential from the new $p\bar{p}\to n\bar{n}$ polarization data
M. Pignone, M. Lacombe, B. Loiseau and R. Vinh Mau 159c

New results on nucleon form factors in the time-like region
E. Luppi 165c

Singlet spin fraction in $p\bar{p}$ and the proton form factor at threshold
B.O. Kerbikov and A.E. Kudryavtsev 177c

$\bar{p}p\to\pi^-\pi^+$ and K^-K^+
D.V. Bugg 183c

New evidence for a narrow $p\bar{p}$ state of mass 2.02 GeV/c^2
A. Ferrer, A.A. Grigoryan, V.F. Perepelitsa and P. Sonderegger 191c

Future of polarization
C. Lechanoine-Leluc 201c

Antinucleon–nucleon annihilation
W. Weise 219c

$N\bar{N}$ annihilation: an experimental overview
A. Rotondi 235c

3. Strangeness and charm production

Charmonium formation in $p\bar{p}$ annihilation by experiment E760
A. Ceccucci et al. 259c

Final states with strangeness from Crystal Barrel and Asterix
K. Braune et al. 269c

From $\bar{p}p\to\bar{\Lambda}\Lambda$ to $\bar{p}p\to\bar{\Sigma}^{\pm}\Sigma^{\pm}$ with PS185 at LEAR
H. Fischer et al. 277c

Exclusive production of hyperon–antihyperon pairs
N.H. Hamann 287c

Heavy and light meson spectroscopy with an internal target at SuperLEAR
M. Poulet 311c

Heavy quarks and nuclei
D.E. Kharzeev 331c

A possible quasinuclear state near the $\Lambda\bar{\Lambda}$ threshold **
J. Carbonell, K.V. Protasov and O.D. Dalkarov 353c

4. $\bar{N}$–nucleus physics

Observation of subthreshold double strangeness production in $\bar{p}$ annihilation on Xe nuclei; search for stable H dibaryon
A.G. Dolgolenko et al. 361c

Nuclear physics with OBELIX
M.P. Bussa et al. 369c

Antiproton induced fission
T. von Egidy et al. 383c

Antiproton–nucleus interactions at 5 to 9 GeV/c
S. Ahmad et al. 393c

Signature of a neutron halo in ^{232}Th from antiproton absorption
J. Jastrzebski et al. 405c

Antinucleon–nucleus physics
T. Bressani 415c

5. CP,T violation

Recent results of the CPLEAR experiment
A. Schopper et al. 437c

A study of T violation via the semileptonic decays of neutral kaons in CPLEAR
K. Jon-And et al. 449c

LEAR upgrading for $\Lambda\bar{\Lambda}$-CP violation
M. Chanel 457c

CP physics at DAΦNE
G. Capon 467c

CP violation and antigravity (revisited)
G. Chardin 477c

* Paper not presented at the conference.

6. Machines, facilities

The physics of SuperLEAR
D.W. Hertzog 499c

SuperLEAR, conceptual machine design
R. Giannini, P. Lefèvre and D. Möhl 519c

The KAON facility – its physics and its status
E. Vogt 537c

Antiproton physics at BNL
D.M. Lazarus 547c

Low energy $\bar{p}$ physics at FNAL
S.Y. Hsueh 561c

A comparison of SuperLEAR with existing or possible facilities
R.A. Eisenstein 569c

7. Future options

Physics highlights of a tau charm factory
E.M. González-Romero 579c

8. Gravitation and antimatter

Fundamental symmetry tests with antihydrogen
R.J. Hughes 605c

Experimental aspects of antihydrogen production and experimentation
C. Zimmermann and T.W. Hänsch 625c

9. Atomic physics

Ultra-low momentum antiprotons in LEAR
S. Baird et al. 635c

High resolution spectroscopy of characteristic X-rays from antiprotonic atoms
D. Gotta 645c

Atomic collision experiments using keV–MeV proton/antiproton beams
E. Uggerhøj 655c

$\bar{p}$ stopping power in hydrogen below 1 MeV and the $\bar{p}$ ^{4}He metastable state
E. Lodi Rizzini et al. 665c

Antiproton trapping in various helium media: report of the HELIUMTRAP experiment at LEAR
E. Widmann et al. 679c

10. Antiproton mass

Measurement of the antiproton inertial mass using a radio-frequency mass spectrometer: present status
C. Thibault et al. 691c

Observing a single trapped antiproton
G. Gabrielse et al. 701c

Trapping of antiprotons in a large Penning trap – progress towards a measurement of the gravitational acceleration of the antiproton *
M.H. Holzscheiter et al. 709c

11. Summary talk

Leap '92: conference summary
C.B. Dover 721c

List of participants 751c

Author index 757c

* Paper not presented at the conference.
